

Exhibitor Graphics & Enhancements

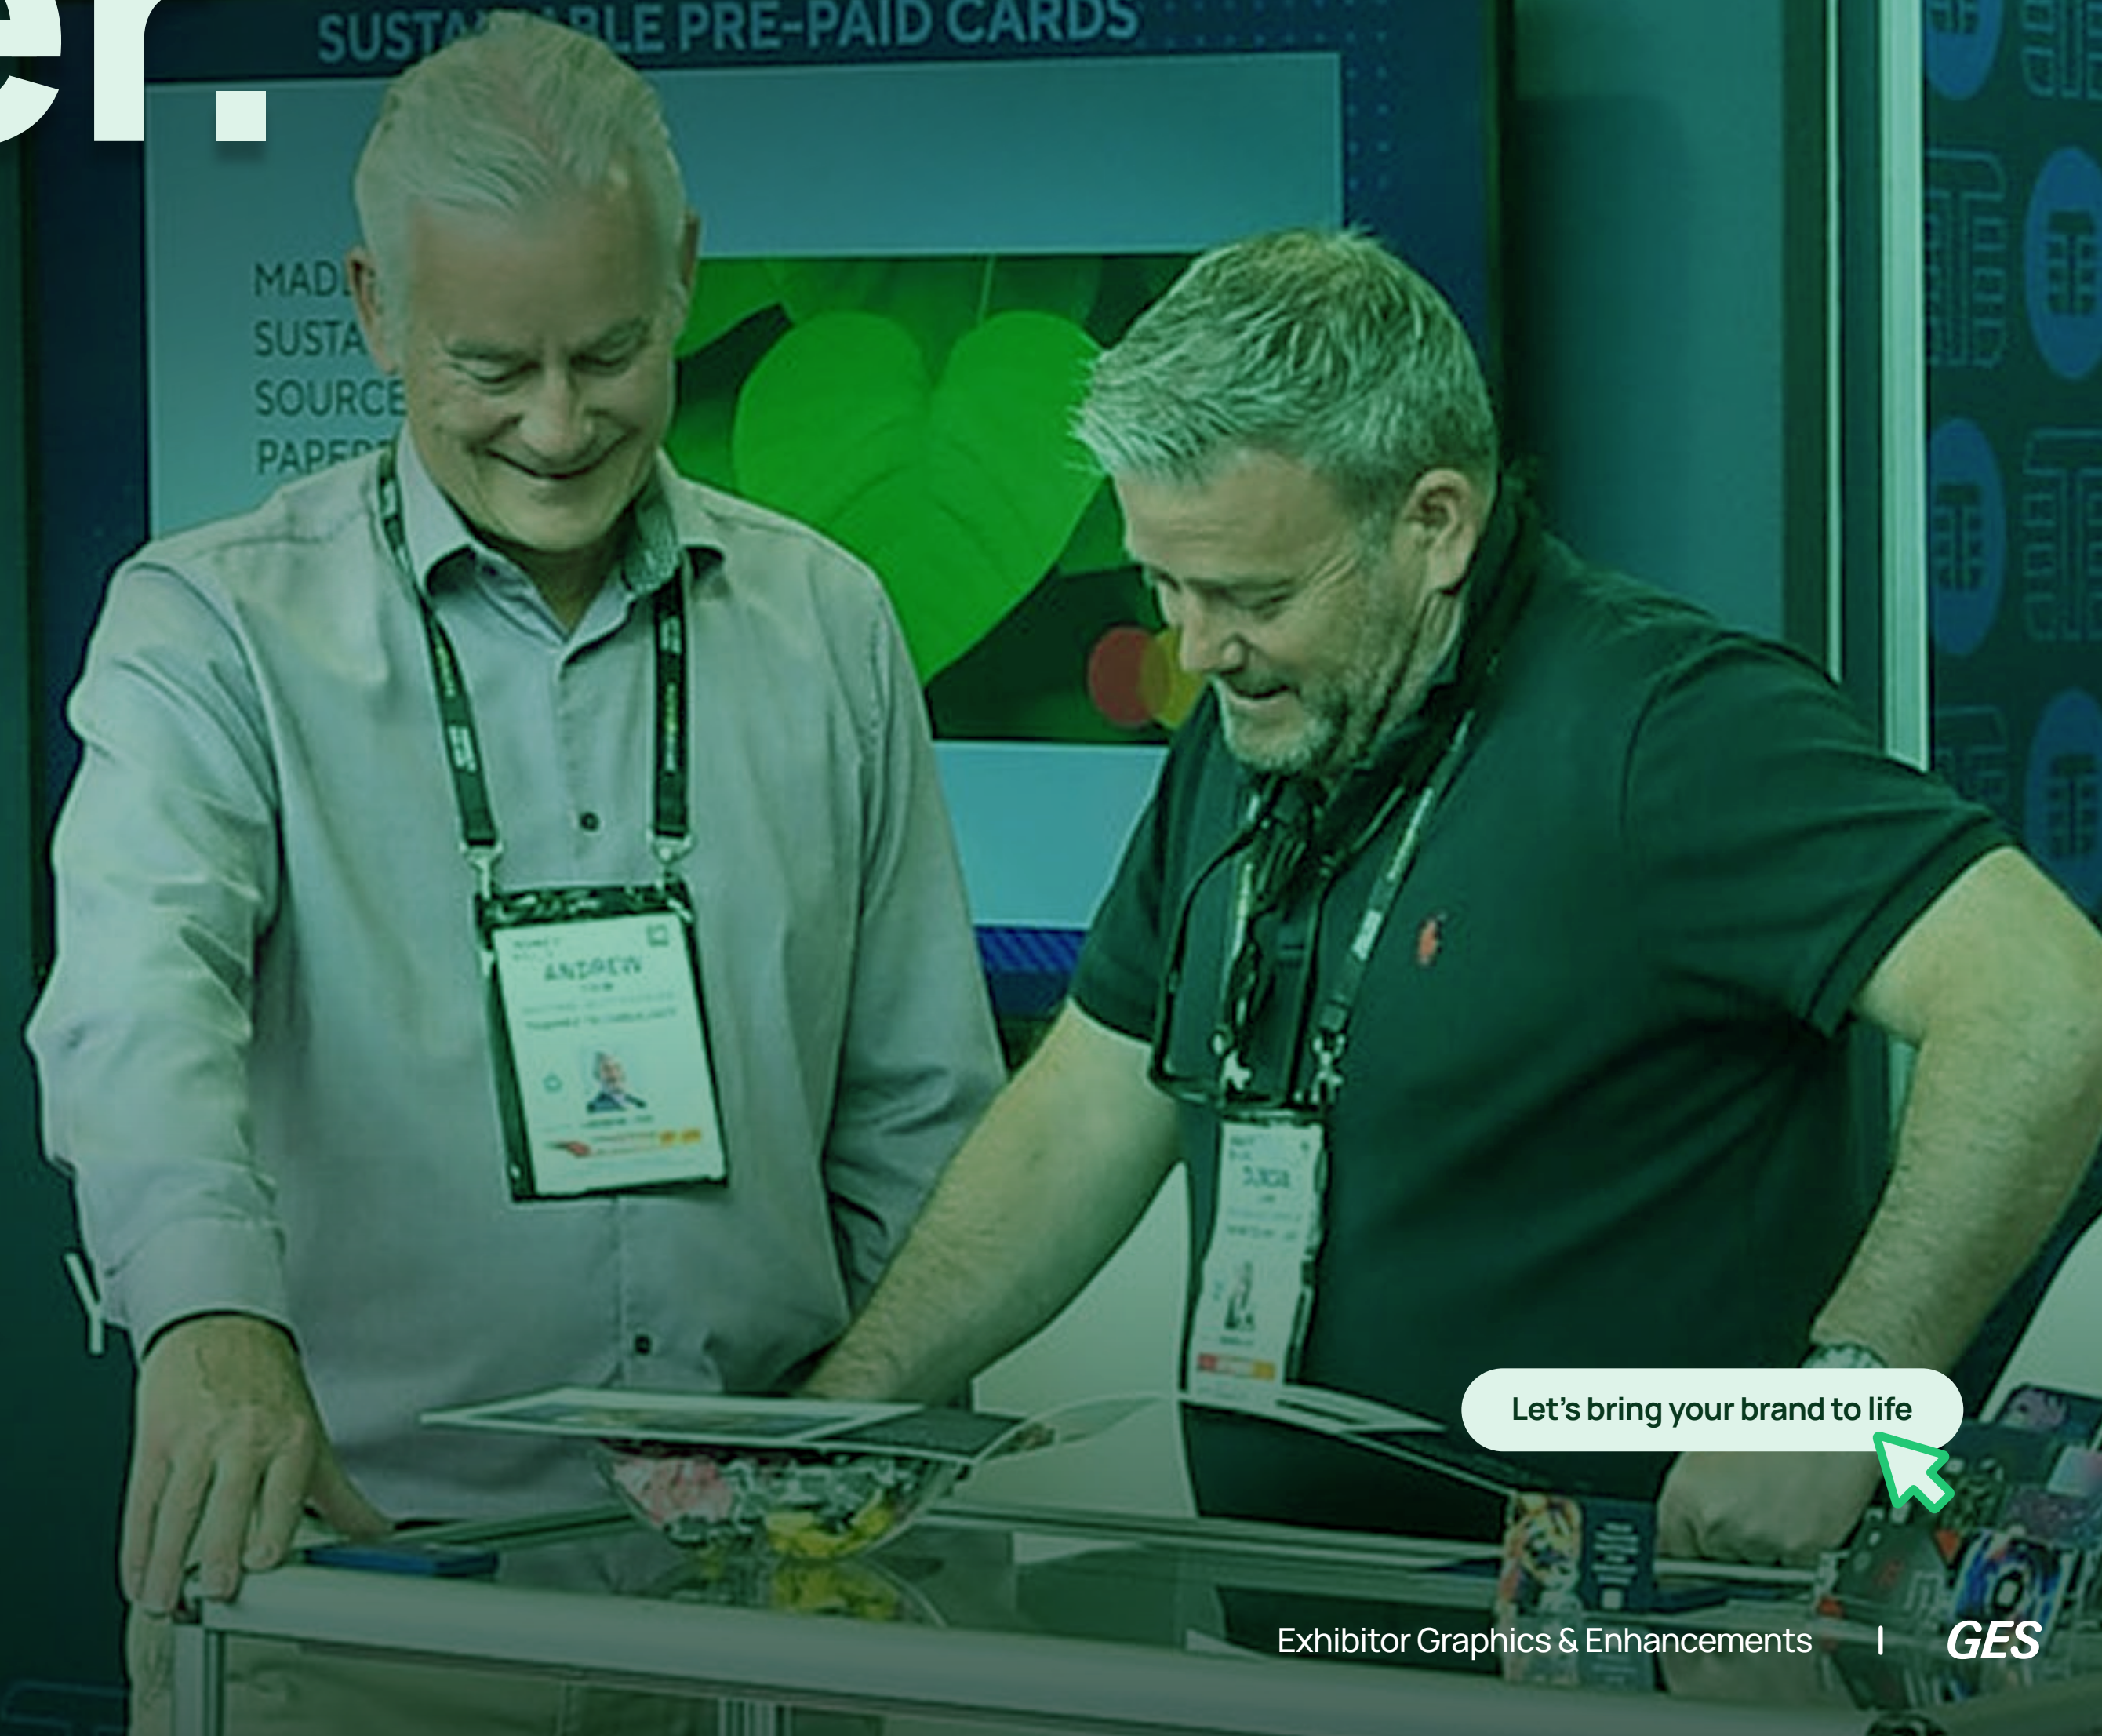

Big ideas don't need big budgets.

AMP

Make your space work harder.

Your shell scheme isn't just a space—it's your stage.

We help exhibitors turn blank walls into powerful brand stories. With high-impact graphics, custom features, and thoughtful design, your stand can do more than just exist. It can engage, inspire, and convert.

Let's bring your brand to life

What you'll find inside

Whether you're exhibiting for the first time or looking to refresh your approach, this brochure covers everything you need to make your shell scheme stand out.

Graphics that grab attention

Overlay, inlay & reusable options

Custom extras

Branded counters, banners, plinths & more

Stand enhancements

Furniture, flooring, fittings

Sustainable solutions

Recyclable materials & planet-first choices

Helpful info

Ordering tips, deadlines & delivery details

Graphics that make your stand work harder

First impressions matter. A well-designed graphic display draws people in, tells your story, and sets you apart from your neighbours. Whether you're launching a new product or reinforcing brand recognition, the right graphic solution will do the heavy lifting for you.

From **seamless overlays** to **modular reusables**, we offer three graphic types—each designed for different needs, budgets, and levels of flexibility.

Seamless & Sustainable

ICS FABRIC GRAPHICS

This full-surface graphic stretches cleanly across the stand frame for a seamless, high-impact display. Printed on 100% recyclable fabric, it covers all visible structure—perfect for bold branding or lifestyle visuals.

- ✦ Seamless fabric graphic
- ✦ Covers all visible system metalwork
- ✦ Printed on 100% recyclable material

Good for

- ✔ Bold brand visuals
- ✔ Clean, full-wall designs
- ✔ Maximum visibility

*visuals are for guidance—your system setup may differ.

Fabric graphics are positioned on top of the frame.

Slick & Structured

INLAY GRAPHICS

These inlay panels slot neatly between the metal uprights of the AMP system. A small gap allows the structure to show through, creating a clean-lined look. Panels are attached with hook-and-loop Velcro for fast, easy setup.

- ✦ Panels sit between framework
- ✦ Hook-and-loop Velcro attachment
- ✦ Small visible gaps for system structure

Good for

- ✔ Product displays
- ✔ Presentations & demos
- ✔ Cleaner visual separation

*visuals are for guidance—your system setup may differ.

Inlay graphics are positioned within the frame.

Sustainable by default

There's no Planet B

That's why our materials are recyclable, our carpets are recycled, and we offer graphics that can be reimaged beyond a single event.

It's not a bolt-on—it's built into how we work.
